DETAILED ACTION

Allowable Subject Matter

1. Claims 1-10 are allowed.

The following is an examiner's statement of reasons for allowance: the references cited disclose an electronic apparatus comprising: a function module having a multiplayer wiring unit including first signal and ground wirings, a first signal via, first signal and ground pads; a multiplayer circuit board including second signal and ground wirings, a second signal via, a second ground pad, third signal and ground pads; a first conductor (solder ball) that connects the first and second signal pads and; a central conductor of a coaxial cable is connected the third signal pad, in combination with the other claimed elements. The Prior Art (figure 21) admitted by applicant discloses a sensor module (2001) having signal and ground (2003, 2005) electrically connected to signal and ground pads (2008, 2010) of a coaxial cable (2015). However, the chip and the board, and the internal structure of them is not taught. Kawada et al disclose a module for mounting driver IC;s as shown in figure 29 comprising a circuit board (6), and a connector (5). Kawada does not disclose the details of the signal wiring and potential wiring with the chip or the board or how they are connected to the external connection. Selna discloses a BGA package, see figure 1, comprising a laminate substrate (4) having signal and ground pads (10B, 10C) electrically connected to signal and ground pads (20) of a circuit board (18) by solder balls (14). However, Selna does not teach the internal wiring of the board, the specific connections, and the coaxial

cable. Further, there is no suggestion to combine these references, and combining them would still not yield the internal wiring details of the circuit board, and their connection to the chip and the coaxial cable as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kresge et al., Selna, Hsu, and Kawada et al. disclose related art.
